

**SPECIFICATION SHEET FOR**  
**POND-PAK® 14-21-14 1-YEAR**  
**CONTROLLED RELEASE FERTILIZER PACKETS**

**Commercial Fertilizer:**

Pond-Paki® 14-21-14 is recommended for all foliage and flowering aquatic plants.

Standard Formulation: Guaranteed analysis of 14% total Nitrogen, 21% available Phosphoric Acid and 14% soluble Potash (**14-21-14**) packaged in a patented controlled release packet.

Pond-Pak® ½ oz. packets provides nutrients to aquatic plants in pots for one year when used indoors or in water gardens in climates with a year-round growing season, and may last longer when used outdoors in climates with a dormant season. It is recommended, however, to install new packets every year for all climates.

Pond-Pak® is applied next to the roots, with no danger of root burning. It feeds the roots directly without leaching through the pot and will not encourage algae growth. Since the packets are installed unopened, it is not only easy to use, but it's safer for you to handle because you never come into contact with the fertilizer itself. Pond-Pak® is also safe to use on ponds with fish.

**Caution:** Pond-Pak® packets are **not** to be opened and emptied directly into the soil. This would destroy the long-term effectiveness of the product, and nullify the controlled release design of the special packaging. In addition, it might cause root burn.

**Directions:**

**Potted Aquatic Plants**

Use 1-2 packets for 4-10 inch, 2-3 packets for 11-14 inch and 3-4 packets or more for 15 inch, and up. Bury packets unopened in the pot, halfway between the plants stem and the edge of the pot, and halfway down or about 3 inches below the surface of the soil.
